

# CHILDSRING INTERNATIONAL

## HIGHLIGHT OF THE MONTH: JHOUELCA

**“...Jhoudelca’s face showed a deep sadness and despair.”**

As the painful mass on her face continued to grow, Jhoudelca’s family became more desperate in their search for medical help. With nowhere left to turn in Haiti, her family recalls Jhoudelca’s face showed a deep sadness and despair. Shy, due to her facial deformity,

Jhoudelca was embarrassed even around her friends.

In early 2017 many prayers were answered when Childspring International brought Jhoudelca to the United States for treatment. A few months and one surgery later, she returned home “a very new daughter.” Her appearance

left her parents speechless and in tears as they gazed upon their daughter for the first time at the airport. Jhoudelca’s physical transformation sparked a renewed interest in doing her best in

school with an eye on her future. From despair to hope to endless joy her family, church, school and community were all affected by Jhoudelca’s renewed outlook on life. Her friends found in her a companion “who has a story and thoughtful testimony to share to help them never lose faith and hope in God.” The group found themselves in church praising Him through song, acknowledging “the power of God when one of His children’s lives is at stake.”

Jhoudelca’s parents now describe their daughter as “a very happy young girl...her life, character has greatly changed . . . the impact of her surgery is beyond measure. We have not experienced such endless joy during our lifetime.”

### **Statistics Update:**

New cases: **5**

Children currently in the U.S: **4**

Year to date total number of children treated: **255**
